LINEAGE:

NL Haze x NL Haze #2

Sativa-dominant

TERPENES:

Myrcene, β -Caryophyllene, α -Pinene

FLAVOR & AROMA:

Sweet and citrusy with a back note of spice

DESCRIPTION:

Two of cannabis' most classic true-breeding strains, Northern Lights and Haze have made their way into more hybrids than just about anything. Northern Lights is a heavy Indica from the Pacific Northwest and Haze is a wily Sativa with roots stretching back to Mexico.

Our selected pheno perhaps shows more of the Northern Lights than the Haze, but the Ocimene-rich sweet and floral aroma does push through. Overall, our NLH is a versatile choice but most users find it most potentially useful for boosts of daytime creativity with a sound backing of body relief.
